NOUREDDINE TRABELSI

Final-Year AI Engineering Student | NLP · Machine Learning · Data Engineering

Ariana, Tunisia | +216 56 512 665 | Noureddinetrabelsi80@gmail.com | LinkedIn: noureddine-trabelsi

PROFILE

Final-year engineering student specializing in Artificial Intelligence, Data Science and Business Intelligence. Seeking a final-year (PFE) internship in AI, NLP or Data Engineering starting February 2027. Interested in semantic search, text embeddings, CV–job matching and LLM-based applications.

TECHNICAL SKILLS

NLP & AI: TF-IDF, LSA, Word2Vec (CBOW/Skip-Gram), GloVe, Sentence Transformers, Hugging Face, cosine similarity, RNN/LSTM, LLM prompting

ML & Data: Python, scikit-learn, pandas, NumPy, Matplotlib, feature engineering, model evaluation

BI & Engineering: SQL, MySQL, SQL Server, Power BI, DAX, Power Query, data-processing pipelines

Development & Tools: Streamlit, Flutter/Dart, Git/GitHub, Jupyter, Google Colab, VS Code, Excel

SELECTED PROJECTS

CVMatchingAI — AI-Powered CV–Job Matching | NLP Semester Project, 2026

• Developed a Streamlit application to compare resumes with job descriptions, identify skills gaps and provide recommendations for CV improvement.

• Implemented skill extraction and text-matching workflows using keyword techniques, sentence embeddings and cosine similarity; integrated LLM-assisted recommendations.

Stack: Python, Sentence Transformers, Hugging Face, scikit-learn, Streamlit.

NLP Analysis of a Corpus of 1,000 CVs | Academic Project, 2026

• Built a preprocessing and analysis pipeline with tokenization, stopword removal, bigrams, TF-IDF, LSA, cosine similarity and word clouds.

• Trained and compared Word2Vec (CBOW/Skip-Gram), GloVe and RNN configurations.

Stack: Python, Gensim, scikit-learn, TensorFlow/Keras, Google Colab.

House Price Prediction | Machine Learning Project

• Performed preprocessing and feature engineering; compared regression models using RMSE and R^2.

Stack: Python, pandas, NumPy, scikit-learn, Matplotlib.

Sales Dashboard | Business Intelligence Project

• Developed interactive Power BI dashboards with KPIs, DAX measures and Power Query transformations using SQL data.

EXPERIENCE

Frontend Developer Intern — Designet Web Agency, Menzel Temime | Jul–Sep 2026

• Contributed to a cross-platform web/mobile application with chatbot integration, developing frontend components in Flutter alongside a Laravel/PHP backend and MySQL database.

• Collaborated with a developer supervisor as part of the project team.

EDUCATION

Ibn Khaldoun University (UIK) — Engineering degree in AI, Data Science & Business Intelligence | Expected Jun 2027

Relevant coursework: NLP, Deep Learning (FNN, CNN, RNN, LSTM), Machine Learning, Business Intelligence, Databases.

ESPRIT — Two years of integrated preparatory classes and first year of engineering studies.

ADDITIONAL INFORMATION

Activities: IEEE Student Branch, ESPRIT (member for three years). **Languages:** Arabic (native), French (professional), English (professional).

Training platforms: Cisco Networking Academy, Coursera (certificate details to be confirmed).
